PERSONAL PROJECTS

Delivery Reviewer

github.com/GarmontDev/Delivery-Reviewer

Technologies: React, Vite, Vitest, TailwindCSS and Firebase

- Developed a barcode-scanning web app to streamline order verification.
- Reduced order review time by 50% by enabling real-time updates and checks.
- Designed an intuitive UI for easy adoption by store employees.

Audiophile E-Commerce

github.com/GarmontDev/Audiophile-Ecommerce

Technologies: React, Vite, Vitest and TailwindCSS

- E-commerce platform designed to browse and purchase high-quality audio equipment.
- This project highlights my skills in front-end development, responsive design, and testing.

GestArmory

github.com/GarmontDev/GestArmory

Technologies: Angular, Express, MongoDB, Jest

- Designed an inventory management app for an armory store.
- Implemented automated reporting and a clean UI for easy tracking.
